

SCAN Policies Database State Profile 2021: Rhode Island

Overview of the SCAN Policies Database

The State Child Abuse and Neglect (SCAN) Policies Database compiles data on the definitions and policies that states use in their surveillance of child maltreatment, along with data on associated risk and protective factors. The SCAN Policies Database is funded by the Office of Planning, Research, and Evaluation in collaboration with the Children’s Bureau in the Administration for Children and Families, U.S. Department of Health and Human Services. Mathematica leads this project in partnership with Child Trends.

The project’s purpose is to review and compile information from states’ definitions and policies to create a database of those definitions and policies that can be used for analysis. The SCAN Policies Database is a resource for researchers, analysts, child welfare agency staff, and others interested in examining differences between states in their definitions and policies on child maltreatment and how they change over time.

Content

The scope of the SCAN Policies Database includes information about state definitions and policies related to child abuse and neglect for all 50 states, the District of Columbia, and the Commonwealth of Puerto Rico. The SCAN Policies Database team gathered this information through a document collection, review, and coding process. The team obtained input from states on data collection through a confirmation and verification process. More information about these data collection procedures can be found in the data user’s guide and data collection protocol, accessible at <https://www.scanpoliciesdatabase.com/data-use-resources>.

The SCAN Policies Database 2021 represents data collected, reviewed, and verified between July 2021 and January 2022. The data reflect the state definitions and policies for the calendar year 2021. The scope of topics in the database includes states’ definitions of child abuse and neglect, as well as information about policies related to reporting, screening, and investigating child maltreatment. Key aspects of the child welfare systems’ response and context are also included.

The content in the SCAN Policies Database is organized into six domains. The state profiles, codebook, data collection protocol, and data file are also organized by these domains. In the protocol, each question begins with a letter prefix identifying the domain for each variable. The six domains with the identifying protocol number prefix are listed below.

Domain	Question prefix
Definitions	D
Reporting	R
Screening	S
Investigation	I
Child welfare response	W
Child welfare system context	C

State profile

This SCAN Policies Database state profile is a summary of the information collected about the definitions and policies for the identified state. It is organized by six domains, with each section containing a set of tables that depict the state's information for all variables within that domain.

The state profile presents data for each variable with “yes,” “no,” “unknown,” or other response as appropriate. The response of “unknown” appears for topics that could not be located from the state's available resources or verified with that state. In some cases, “logical skip” appears when a question was not applicable to a particular state, given a related response on a preceding question.

Data use resources

Several data use resources are available to support users of the SCAN Policies Database:

- **Data user's guide:** The guide has detailed information about the data set, including the process used to collect and review the data, the scope of information included in the data set, guidance on using the data, such as how to link the data with other data sources, and notes about specific topics. The data user's guide includes appendices with information on corrections to the SCAN Policies Database 2019 and a summary of changes to the data between 2019 and 2021 that reflect changes to state laws and policies during that time period. There is one data user's guide that is updated and applicable for all rounds of data collection for the SCAN Policies Database.
- **Codebook:** The codebook provides information about each variable in the data set, including variable names, labels, definitions, protocol number, variable type, and frequencies. The codebook includes several appendices, including a list of all sources used to review and code data. There are separate codebooks to summarize the data from each round of data collection.
- **Data collection protocol:** The protocol has the questions used to collect information about states' statutes and policies as part of the data review and coding process. There are separate data collection protocols for each round of data collection for the SCAN Policies Database.

These data use resources can be found on the SCAN Policies Database website (<https://www.scanpoliciesdatabase.com/data-use-resources>) or from the National Data Archive for Child Abuse and Neglect (NDACAN) (<https://www.ndacan.acf.hhs.gov/>).

g. Other (specify)	Logical Skip
4. Eligibility for differential/alternative response determined by a risk determination	
a. No	No
b. Yes	Yes
c. Other (specify)	No
d. Unknown	No
5. Tools used to determine risk for differential/alternative response	Yes - Validated assessment tool
6. Risk level eligible for differential/alternative response	
a. No risk	No
b. Low risk	No
c. Moderate risk	No
d. Other (specify)	No
e. Unknown	Yes

Table XII (continued)

	Response
7. Other types of cases or conditions eligible for differential/alternative response	
a. No other cases or conditions	No
b. No immediate safety concerns	No
c. No or few prior reports of child abuse or neglect	No
d. Other (specify)	Yes - Age of alleged victim is under 6 years; The call floor worker considers the following factors to determine if the report should be screened in for differential response, if the report doesn't meet the criteria for a traditional response: (1) a caretaker or child's emotional, physical, or developmental condition, (2) circumstances indicating that the caregiver's protective capacity may be compromised, (3) a prior report within a 12-month period involving a family with a child age 6 or under, or with 2 or more children, (4) 1 or more prior reports received on a family within a 3-month period, (5) a prior indicated investigation or removal within the past 12 months, (6) any other risk factors that may compromise the well-being of the child, (7) whether the report was called in by a professional mandated reporter
8. When is determination made for differential/alternative response	
a. At time of screening to screen out to differential response	Yes
b. After a report is screened in	No
c. Other (specify)	No
9. Referrals to community services for cases engaged in differential response	
a. No	No
b. Yes - for all cases	No
c. Yes - when families express interest	No
d. Yes - when there is a determination of risk	Yes
e. Yes - other (specify)	No

Table XIII. In-home services, foster care, and permanency

	Response
1. In-home services provided for unsubstantiated cases to maintain intact families	
a. No	No

Supplemental Notes on State

Definitions

Other abuse or neglect is defined as "any action or lack of action by a parent or caregiver or person responsible for a child's welfare which results in harm or potential harm to the physical, mental health, behavioral health or welfare of the child and which is not covered by the other allegations."

Reporting

When making a report, the reporter will only be asked for personal information if not making the call anonymously.

Investigations

During an investigation, visiting a child's home is only required for cases that are assigned to an investigation or a family assessment response.

Child welfare response

Differential response, which the state calls "family assessment," is used for reports that do not meet the criteria for an investigation but contain risk areas and vulnerability factors that warrant a family assessment response. These vulnerability factors include the following:

1. Children age 6 and younger
2. Caretaker or child's emotional, physical, or developmental condition
3. Circumstances indicating that the caregiver's protective capacity might be compromised
4. Prior report within a 12-month period involving a family with a child age 6 or younger, or with two or more children
5. One or more prior reports received about a family within a three-month period
6. Prior indicated investigation or removal within the past 12 months
7. Any other risk factors that might compromise the well-being of the child
8. Whether the report was called in by a professional mandated reporter In-home services are available from contracted community providers.

The state's case managers who are assigned to children manage the child's service plan regardless of the placement (foster care, congregate care, home placement, etc.).
